Activity: Bird Beak Adaptation Lab  
Introduction: How are bird beaks adapted to the foods they eat? In this lab, we will simulate a scramble competition (kind of like in the old kids' game, "Hungry, hungry hippos") between six species of birds in six different environments. Each bird has a different beak type (spoonbill, tweezerbeak, tongbeak, etc.) and you will find that depending on the food available, some will do better than ...

Hawaiian Bird Beak Adaptation Lab - hilo.hawaii.edu  
Minnesota Valley National Wildlife Refuge Birds, Beaks and Adaptations Sept. 2011 Page 2 of 13 decide the answer together. After everyone has agreed, the ONLY team member that may answer the question is the team captain. If the team is correct, they will receive the points.
