For complete versatility, the Biomet fracture stem has been designed to accommodate all Biomet bi-polar and uni-polar components. Bi-polar components are available manufactured from stainless steel and CoCrMo. To facilitate intra-operative flexibility all modular heads are available separately, thus allowing accurate neck length reconstruction.

Biomet was a large manufacturer of hip replacement products before it was bought by its competitor Zimmer. Several Biomet hip implants helped improve patient's lives, but one line of products didn't live up to expectations. Biomet's metal-on-metal implants cost the company millions of dollars in litigation and compensation costs.
