STEM Education utilizes interdisciplinary skills from Science, Technology, Engineering, and Math to engage kids in inquiry and solution-based learning. By challenging kids to explore, create, inquire, observe relationships, predict outcomes, and find solutions to problems, STEM Education promotes critical thought processes that kids can then apply to their everyday world.

Interdisciplinarity - Wikipedia

How to Plan and Design Child Care Centers. Between infancy and school age, a child may spend up to 12,500 hours in a child care facility. Because children spend such long hours in child care centers, facilities located in GSA-managed spaces must meet special design requirements that exceed base guidelines for federal buildings.
