CADtoEarth™ for Autodesk® Revit® | Revit | Autodesk App Store
Hi friends I have to design a building on a hilly site. So, i need to create a model in Revit of this hill topography showing contours and site features such as trees. I have explored this forum and you tube to find a way to import it from Google Earth in to Revit. I came across so many ways of ...

What the new offerings mean for you: BIM Collaborate Pro ...
The key insight behind our approach is that while it is relatively difficult to generate a dataset from scratch with particular statistical properties, it is relatively easy to take an existing dataset, modify it slightly, and maintain those statistical properties. We do this by choosing a point at random, moving it a little bit, then checking that the statistical properties of the set haven't ...

Solved: Google Earth to Revit - Autodesk Community
OBJ Exporter works with Revit 2016, 2017, 2018, 2019,2020, and 2021.1. Rebar Entity Supported. Control the scale of output OBJ file. Rotate by function, which allows us to specify the angle at which we want the model to be rotated in the output OBJ file and the plane to which we want it to be rotated (i.e. X, Y & Z - Plane).
