MySQL :: MySQL Internals Manual :: 1.2.1.1 GNU Debugger

And it is! It seems that the support for MySQL is a great feature, but by default, in some distributions it's not listed. When you select to save your data, you only get the option to save it as a file - which got me wondering around looking for options. So in order to enable the MySQL backend support for GNUMCash you need to the following:

GNU SQL

```
[local-host]# mysql -V mysql Ver 14.14 Distrib 5.1.25-rc, for redhat-linux-gnu (i686) using readline
5.1. Connect to the MySQL database using the root user and make sure the connection is successfull.
[local-host]# mysql -u root -p Enter password: Welcome to the MySQL monitor.
```
