It touches on safety for you and your patient, transferring patients, patient assessment, infection control, venipuncture, patient communication and many other helpful skills that are placed upon techs on a daily basis.

Patient-centered Radiology | RadioGraphics

INTRODUCTION: There is growing awareness of the importance of patient centred care (PCC) in health care. Within Radiography in the UK, elements of PCC are embedded within professional body publications and guidance documents, but there is limited research evidence exploring whether perceptions of PCC are equivalent between those delivering (radiographers) and those experiencing (patient) care.

institution, and self. • Discuss the patient care partnership. • Describe patient reactions to illness. • Describe the correct techniques for obtaining accurate vital signs.

Back to Basics in Patient-Centered Care in Radiology ...

Radiography is essential reading for researchers, radiographer practitioners*, radiography educators and student radiographers. We aim to influence clinical practice and patient care by informing practitioners, managers, leaders and policy makers working within or aligned to clinical imaging and radiation therapy services.

Patient Care in Radiography PDF - books library land

On a macro scale, the shift away from direct patient-provider engagement has diminished the perception of the central role radiology plays in patient care. As a member of the Radiological Society of North America (RSNA) Patient-Centered Radiology Steering Committee, I was involved in a recent project in which we surveyed 694 RSNA members on various aspects of patient-centered radiology.

Patient Care in Radiography - E-Book: With an Introduction ...

Patient transfer. Often a medical emergency occurs when a patient is transported to or from the radiographic suite or in the radiographic area. Therefore all students or any radiology staff involved in patient care must be qualified in cardiopulmonary resuscitation (CPR), which is the restoration of function of the heart and lungs after apparent death.
