Exercise and Solution Manual for A First ... - Linear Algebra

The book's title suggests that it is not the typical approach to linear algebra even among those books that are more theoretical. For example, the concept of a basis is treated as more fundamental than the concept of linear independence, and linear transformations are introduced before solving systems of linear equations.

Chapter 1 Exercise A - Solutions to Linear Algebra Done Right

Besides being a first course in linear algebra it is also supposed to be a first course introducing a student to rigorous proof, formal definitions/in short, to the style of modern theoretical (abstract) mathematics. The target audience explains the very specific blend of elementary ideas and concrete examples, which are usually presented in introductory linear algebra texts

What is particularly done "wrong" in the book? Before answering these questions, let me first describe the target audience of this text. This book appeared as lecture notes for the course "Honors Linear Algebra". It supposed to be a first linear algebra course for mathematically advanced students. It is intended for a student who, while not yet ...

Chapter 2 Exercise A - Solutions to Linear Algebra Done Right

Solution: The dimension of a subspace U of \mathbb{R}^2 can only be 0, 1, 2. If $\dim U = 0$, then $U = \{0\}$. If $\dim U = 2$, then $U = \mathbb{R}^2$ by problem 1. If $\dim U = 1$, then for any nonzero $x \in U$, it follows that $U = \{kx : k \in \mathbb{R}\}$, which is the line through x and the origin. 3. Solution: It is similar to Problem 2.

Solutions to Linear Algebra Done Right (9783319110790 ...

This means $\sqrt[3]{1 + \sqrt{3}i}$ is a cube root of 1. Solution2: Note that $(a + bi) + (a - bi) = 2a$ and $(a + bi)(a - bi) = a^2 + b^2$, it follows that $\sqrt[3]{1 + \sqrt{3}i}$ is a root of the quadratic equation $x^2 + x + 1 = 0$. For $\sqrt[3]{1 + \sqrt{3}i} + \sqrt[3]{1 - \sqrt{3}i} = \sqrt[3]{1}$ and $\sqrt[3]{1 + \sqrt{3}i} \sqrt[3]{1 - \sqrt{3}i} = 1$. Because $x^3 - 1 = (x - 1)(x^2 + x + 1)$, we obtain the conclusion.
