Paralysis is a loss of strength in and control over a muscle or group of muscles in a part of the body. Most of the time, this is not due to a problem with the muscles themselves. It is more likely due to a problem somewhere along the chain of nerve cells that runs from the body part to your brain and back again.

### Paralysis: Causes, Symptoms, Diagnosis & Treatment

11. Sleep paralysis may be caused by sleep deprivation Irregular sleep schedule can trigger sleep paralysis. Researches have consistently proved that if you get less sleep and you are exhausted, the chances of sleep paralysis are higher. So, if you want to avoid sleep paralysis, make sure you get enough sleep – at least 7.5 – 8 hours, each ...
